

The Simplest Wrapping Machine Scale...Ever

The standard 5 x 5 foot Inscale base, bolted to the 4 x 4 foot base can be installed together to support most pallet wrap machines. The six 5,000 lb. load cells, powered by a digital indicator will support the pallet wrappers, and their load to 10,000 lbs. All wires are run underneath the scales along the perimeter so the machine can easily be bolted anywhere from the top of the scale.

*The scales can be easily assembled and disassembled for mobility and/or delivery.
